In support of improving patient care, this activity has been planned and implemented by the Postgraduate Institute for

JOINT ACCREDITATION
INTERPROFESSIONAL CONTINUING EDUCATION

Medicine and The New York Cardiological Society. Postgraduate Institute for Medicine is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the healthcare team.

Physician Continuing Medical Education

The Postgraduate Institute for Medicine designates this live activity for a maximum of 7.0 AMA PRA Category 1 Credit(s)[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Credit Statement for ABIM MOC

This activity is approved for ABIM Maintenance of Certification Part 2 credit.

The “Recent Evidence for PCSK9 Inhibitors in Patients With Dyslipidemia” symposium is provided by Med-IQ and supported by an educational grant from Amgen. Credit for this portion of the symposium will be provided separately.

Disclosure of Conflicts of Interest

The Postgraduate Institute for Medicine (PIM) requires instructors, planners, managers, and other individuals who are in a position to control the content of this activity to disclose any real or apparent conflict of interest (COI) they may have as related to the content of this activity. All identified COI are thoroughly vetted and resolved according to PIM policy. PIM is committed to providing its learners with high quality activities and related materials that promote improvements or quality in healthcare and not a specific proprietary business interest of a commercial interest.

TARGET AUDIENCE

This activity is intended for cardiologists, cardiothoracic surgeons, internists, family practitioners, gerontologists, oncologists, cardiac nurse practitioners, physician assistants, cardiology fellows in training (FITs), all members of the cardiovascular team (CVT) or any other medical professionals engaged in care of patients with cardiovascular disease.

PROGRAM OBJECTIVES

At the conclusion of this presentation participants should be able to:

- Outline available evidence describing the short- and long-term benefits and limitations of PCSK9 inhibitors for patients with dyslipidemia
- Incorporate evolving data and guideline recommendations into individualized treatment decisions for patients with dyslipidemia who may be eligible for PCSK9 inhibitor therapy
- Classify and identify treatment strategies for minor and major bleeding associated with the use of apixaban, dabigatran, edoxaban and rivaroxaban
- Select and interpret appropriate coagulation tests to manage the care of a patient who is experiencing a major bleed
- Identify appropriate sources for clinical practice guidelines for managing DOAC-associated major bleeding
- Explain the history of ABIM Maintenance of Certification (MOC) requirements
- List possible future options of (MOC) requirements and how the ACC will assist cardiologists who choose to participate in MOC
